## *Alliance in Action* 2026

HEALTHCARE FINANCING SUMMIT

HEALTHIER. LONGER.  
BETTER LIVES

### | SYNOPSIS |

Similar to many developed economies, Hong Kong is facing significant challenge of managing rising healthcare costs while ensuring long-term sustainability of its healthcare financing system. AIA also experienced this and is committed to addressing the needs of patients, promoting appropriate healthcare, and controlling medical expenditure within the affordable limits of our customers and the wider Hong Kong community.

Through the Summit, AIA invites respective officials to speak on the progress and outcomes of relevant healthcare policies and guidelines, and to talk about the way forward. Key areas of focus include strengthening stakeholder engagement, reinforcing the regulatory framework, and improving the handling of medical complaints.

At the Summit, AIA will outline how it is embracing these healthcare directives, placing patients at the centre of care and strengthening collaboration with healthcare providers. We will also pilot a New Partnership Model, developed in collaboration with renowned institutions, that aims to enhance healthcare quality, accessibility and affordability. This model has the potential to be extended to like-minded partners who share a common vision of delivering greater value and better health outcomes for the community.

To facilitate meaningful dialogue, the Summit will introduce the framework underpinning this partnership model, followed by roundtable discussions that bring together key stakeholders to exchange perspectives, insights and recommendations. Through constructive engagement and collaboration, participants will explore opportunities to address industry challenges, strengthen alignment across the healthcare ecosystem, and drive collective action towards a more sustainable, patient-centric future for healthcare, insurance and Hong Kong as a whole.
